**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### Claim Objections

Claims 6-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must not depend upon another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6-8 not been further treated on the merits.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6935766 B2.**

FIG. 5A

FIG. 5B

FIG. 4

Per claims 1 and 5, 766 teaches a light reflector plate comprising a reflector plate fabricated by forming predetermined areas of a light-reflecting plastic film or sheet into a three-dimensional shape [see figure 5B and column 1:43-46], to which a shape-retentive component is fixed [see 13c, 14b and column 4:25-26].

Per claim 5, see slits formed at the corner.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

**Claims 2-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over 766 n view of US 6943855 B2.**

Per claims 2-3 and 5, lacks said light-reflecting plastic film or sheet being a thermoplastic resin film or sheet having numerous fine bubbles or pores with a mean bubble diameter of 50 .mu.m or less and US 6935766 B2 lacks the thermoplastic resin film or sheet containing fillers, wherein numerous voids are formed with said filler as the core. However, US 6943855 B2 teaches using bubble of less than 50 microns in a plastic film or fillers in the plastic in order to form a diffusing reflector [column 4:4-7 and column 6:28-34]. Accordingly, it would have been obvious to one of ordinary skill at the time of invention to combine the US 6943855 B2 diffusing reflector with 766 in to reduce hotspots.

**Claims 2-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over 766 in view of US 4211473 A.**

Per claims 4-5, 766 lacks said thermoplastic film or sheet containing fillers containing a porous stretched film or sheet, wherein numerous voids are formed with said filler as the core by forming an un-stretched film or sheet containing fillers and stretching said un-stretched film or sheet. However, US 4211473 A using a porous stretched reflector for forming a diffuse

reflector. Accordingly, it would have been obvious to one of ordinary skill at the time of invention.
